The External Pedagogy—Online Learning Support (OLS) team is looking to onboard an intern to help develop, maintain, and support Berkeley’s data science offerings online. A lot of the work can be done remotely, but you are expected to attend weekly team meetings and various other events. As a prospective candidate, you should be excited by the ability to have an impactful reach to thousands of students around the world. You will be helping support the operations of Berkeley’s edX course Data 8X. You will also be working on implementing a large-scale education initiative in collaboration with industry, which has a global reach in the technology community. You will work alongside many members of the Data 8 course staff and be paired with a mentor to help support your growth.

**Responsibilities**

- Support students online by answering pedagogical questions and debugging issues
- Develop and package existing content to be deployed on new learning platforms
- Attend weekly team meetings where you will report the progress, achievements, and potential concerns of your ongoing projects and responsibilities

**Position Details**

- This position is paid.
- 8-10 hours weekly commitment during the semester.

**Qualifications**

- Interested in data science and growing data science education (inter)nationally
- Have a strong understanding of the concepts taught in Data 8, having attained at least an A- in the course
- Great attention to detail

**Bonuses**

- Experience working on course staff for a data science course
- Previous experience taking an online course
- Marketing ability and interest in expanding the reach of our online offerings
